

## Directions for assembling and exploitation

The furniture lock is suitable for assembling in metal, wooden or other constructions

### Technical data

The furniture lock provides a high level of reliability. Full control over the key duplicates with a plastic code card with an unique code number(except mod.S).

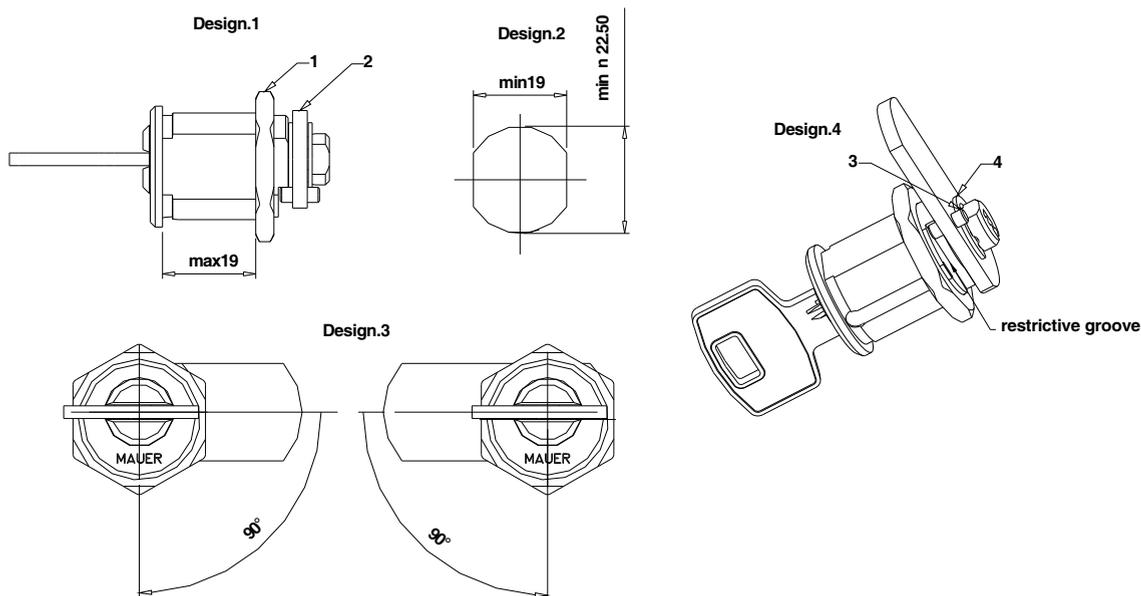

The furniture lock is with a unique profile.

This lock is suitable for using in a Master Key System.

The furniture lock allows you to pull out the key, only when the lock is closed .

### Directions for assembling

1. The furniture locks allows assembling into details with thickness up to 19 mm, see design 1;
2. For the assembling of the furniture lock it is necessary to make an opening with size according to design 2;
3. The lock allows assembling of the cam in two work positions, see design 3;

4. Set the lock into the opening according to design 2;
5. Assemble the nut pos. 1;
6. Set the cam pos. 2 while observing the fixing pin pos. 3 to fall into the restrictive groove;
7. Check if the work direction of the cam is the right one. If not, you should pull out the cam, turn it into 180° and then repeat step 6 and 7;
8. Set the rotor ring pos. 4 while observing the "ears" of the rotorring to fall into the openings, purposed for holding.

### Directions for exploitation

It is not allowed lubrication of the lock with other lubricants;

Before unlocking put the whole key into the lock;

Do not turn the key with other additional instruments or tools.
